ATTENTION BLACKBERRY USERS

Have you ever wondered why you can't wirelessly synchronize all of your Blackberry's important information? Are you stuck in Wireless EMAIL ONLY mode wishing that you had instant, real-time access to your Calendar and Contact data as well...?

Well now you can... Blackberry Professional Software will allow you to wirelessly sync your Blackberry's EMAIL, Calendar AND Contacts. Once you're up and running on Blackberry Pro, you'll no longer have to synchronize at your desktop in order to get updated Calendar and Contact information.

And get this.. For a limited time, Blackberry is offering Blackberry Professional Server software for FREE. Normally the price of admission for this software is \$499, but now you can obtain this product absolutely FREE for the first device. Additional devices can be added for \$100 each.

Another must-have feature that you get with the Blackberry Pro Software is the ability to remotely Erase and Disable a Blackberry in the event that it's lost or stolen. We all carry around a lot of information these days, some of which is personal and/or confidential. Having the ability to remotely erase this data if needed certainly limits your company's liability if one of your users should lose or misplace their device.

So if you've got Blackberry's, this is a really great time to take advantage of an offer that won't be around long.

Give IDSI a call today at 248-543-5300 option 2, to speak to a Blackberry consultant to get your FREE Blackberry Professional Software
